

Subject Guide

Year 7&8

YEPPOON STATE HIGH SCHOOL

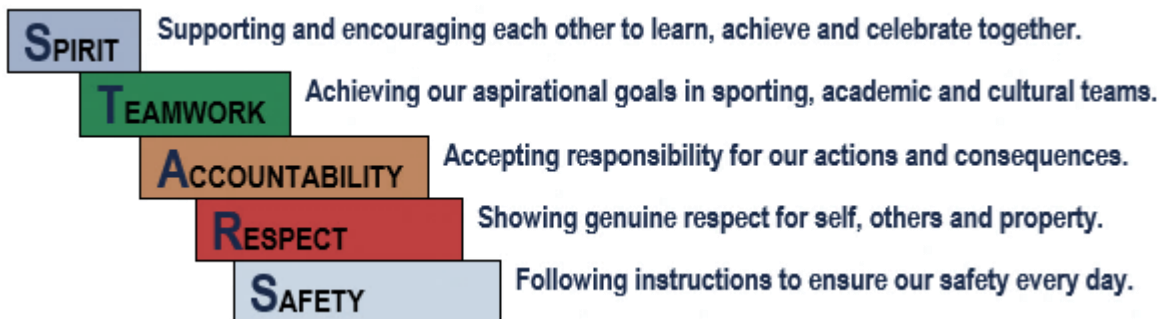

Together we succeed

Principal's Welcome

Dear parents and carers

Thank you for choosing our school for your child's secondary education. At Yeppoon State High School, we have established expectations which support every child's improvement, be that academic, social or emotional.

These expectations are known as our "STARS":

We recognise the importance of an effective transition between primary school and high school. As such, our school provides a broad range of experiences to enable informed choices as each student progresses into each phase of learning; junior, middle and senior secondary.

Regards

James O'Neill

Principal

Guidance Officer (Years 7-9).....	Ms Peta Thomas/ Ms Shannon Devenish
Guidance Officer (Years 10-12)	Mrs Lisa Ramsay
Guidance Officer (Wellbeing)	Mrs Roxanne Franke
International Student Program Coordinator	Ms Samantha West
International Homestay Coordinator	Mrs Kylie Johnstone
School Chaplain.....	Ms Amelia Sell
Industry and Vocational Training Officer.....	Mrs Heather Sanders
Youth Support Coordinator	Mrs Kerrie McDonald
Youth Worker.....	Mrs Jillian Jeffries
Link and Launch Coordinator.....	Mrs Emma Kirkland

At Yeppoon State High School

Expectations are created by:

- Engaging students in a developmental program of authentic and real-life learning experiences
- Preparing students for the structural, social and cultural changes brought about by the Primary to Secondary school transition
- Being familiar with Yeppoon State High School setting
- Providing wide and varied subject choices where students are expected to investigate and plan while continuing to develop reading, writing and arithmetic skills

This might be demonstrated through:

- Project-based real-life learning which has been developed through collaborative planning and community involvement
- Problem-based real-life learning
- Effective profiling of primary students, linking this to the high school setting
- Students playing an active role in leadership at the school, for example, the Student Parliament
- Students working towards developing individual learning pathways that will lead to an exit strategy from the school
- Teachers modelling excellence and quality

Relationships are created by:

- Students knowing about the school before they arrive e.g. Transition days
- Students and teachers working together on longer-term and deeper relationships

This might be demonstrated by:

- Effectively profiling primary students and making strong links with the high school setting
- Ensuring teachers have fewer students and therefore have more time to develop better relationships
- Students spending more time in collaborative learning in the same classroom
- A pastoral care program that leads students to become well-rounded, resilient citizens

High quality teaching is created by:

- Providing more time for each student so that students develop skills and knowledge at greater depth
- The delivery of clearly-explained tasks and assessment processes
- Using motivational content presented, wherever possible, in a real-world context
- Designing student learning around what is relevant and useful to the learner
- A dedicated teaching staff willing to support students to lift achievement

Subject Offerings

At Yeppoon SHS we focus on collaboratively working to improve student engagement and to optimise student potential. Strategies have been developed to help students enjoy school which in turn means they will learn more effectively.

Our Yeppoon SHS core values of Spirit, teamwork, accountability, respect and safety are at the core of our expectations required to optimise student learning and student outcomes. It is well documented that a student who feels they are valued in the school and feels a part of the school community will engage more in their learning.

Yeppoon State High School offers quality access to the Australian Curriculum through a focus on connection, extension, and expansion of the skill-set required to be a 21st Century Learner. Featuring Core and Rotational subjects, students are given multiple opportunities to show what they know and can do by exploring subjects that allow them to use not only their skills in literacy and numeracy, but critical thinking, physical and artistic skills that enable them to have an opportunity to shine. In the following pages, you will find a brief description of the subjects offered to students. Subject offerings are arranged in pathways to give a continuous learning journey through the Junior Secondary School years.

The mandated subjects include English, Health and Physical Education, Languages – Japanese, Mathematics, Science, and History. Along with these, students will experience a range of subjects across all the Key Learning Areas during Year 7 and 8 as listed below. Students will take part in a rotational process where they will experience each of these subjects throughout the year.

Please take the time to read the following pages to learn about our subject offerings.

Course Organisation in Year 7 & 8

Music Excellence

Netball

Rugby League

Core Subjects

ENGLISH

ENG

Core Subject

Brief Description of Subject

Yeppoon State High School's Year 7 and 8 English program is designed to provide a smooth transition for students entering secondary school. Throughout the year, students will be encouraged to read widely and enjoy language in its many forms.

English classes will provide students with many opportunities to further traditional communication skills: reading, listening, speaking and viewing. Students will begin the learning process so they can become discerning readers and producers in a modern, linked world of instant communication. Teachers will be continually consolidating many aspects of grammar, punctuation and spelling and challenge each student to work to their potential.

Our new national curriculum has major threads running through each year of the junior program. They include: an awareness of Asian cultures, the oral traditions of Australia's indigenous cultures, 21st Century technology and sustainability. Our course constantly promotes higher order thinking such as justification, evaluating, analysing, synthesising and seeing things from another's perspective.

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1	Course Outline: Creative response to literary texts Assessment: Written — imaginative written response Seen task/supervised 300-400 words	Course Outline: Conversations about issues in texts Assessment: Spoken — persuasive spoken response 3-5 mins Analysis of an advertising campaign that is for the public good.
TERM 2	Course Outline: Conversations about issues in texts Assessment: Written response for a public audience 300-400 words	Course Outline: Conversations about concepts in texts Assessment: Written 350-450 words Analysis of the way a narrative device(s) is used in two texts from various times
TERM 3	Course Outline: Conversations about concepts in texts Assessment: Spoken — persuasive spoken response 3-4 mins	Course Outline: Creative response to literary texts Assessment: Written — imaginative written response Seen task/supervised 350-450 words
TERM 4	Course Outline: Critical responses to literary texts Assessment: EXAM Written — analytical written response Unseen task: 300-400	Course Outline: Critical responses to literary texts Assessment: EXAM Written — analytical written response Unseen task 350-450 words
Homework	It is expected that students complete at least 20 minutes English homework three times per week. This will include tasks set by the teacher, spelling from the Student Planner and wide reading.	

**Excursions /
Camps**

There are no set excursions for this subject, however, they may occur from time to time.

Future Pathways

Year 9

English

SCIENCE

SCI

Core Subject

Brief Description of Subject

Science develops students’ curiosity and sense of wonder as they gain skills in working in a scientific way and use those skills to explain, predict and model their understandings of the physical and living worlds.

The Junior Science pathways lead to the many senior subjects needed for employment in and enjoyment of our rapidly changing scientific and technological world.

Throughout the course students examine how scientific knowledge changes as new evidence becomes available and is re-interpreted by scientists. They engage in investigations related to the unit and build up their scientific knowledge for future science studies.

The units are based on the National Curriculum and include:

- **Chemistry** – water, mixtures and particles (yr7) - materials, their construction, reactions and interactions (yr8)
- **Earth** – eclipses, seasons, other phenomena affecting our lives and productivity (yr7) dynamic nature of the rock cycle, forces involved, minerals: uses and abuses (yr8)
- **Physics** – Forces affecting an object’s motion (yr7) energy transformations, conservation and renewables (yr8)
- **Biology** – classifying organisms, food chains and webs, ecosystems and conservation (yr7) investigating cells, microscopes and reproduction (yr8)

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1	<p>Course Outline: Change to an object’s motion is caused by unbalanced forces, including Earth’s gravitational attraction, acting on the object.</p> <p>Assessment: 1 x Examination</p>	<p>Course Outline: Properties of the different states of matter can be explained in terms of the motion and arrangement of particles. Differences between elements, compounds and mixtures can be described at a particle level. Chemical change involves substances reacting to form new substances</p> <p>Assessment: 1 x Examination</p>
TERM 2	<p>Course Outline: Mixtures, including solutions, contain a combination of pure substances that can be separated using a range of techniques.</p> <p>Assessment: 1 x Student Experiment 1 x Research Investigation</p>	<p>Course Outline: Energy appears in different forms, including movement (kinetic energy), heat and potential energy, and energy transformations and transfers cause change within systems</p> <p>Assessment: 1 x Examination 1 x Research Investigation</p>

TERM 3	<p>Course Outline: Predictable phenomena on Earth, including seasons and eclipses, are caused by the relative positions of the sun, Earth and the moon.</p> <p>Assessment: 1 x Examination 1 x Research Investigation</p>	<p>Course Outline: Cells are the basic units of living things; they have specialised structures and functions (ACSSU149). Multi-cellular organisms contain systems of organs carrying out specialised functions that enable them to survive and reproduce</p> <p>Assessment: 1 x Examination 1 x Research Investigation</p>
TERM 4	<p>Course Outline: Classification of living organisms and Interactions between organisms, including the effects of human activities can be represented by food chains and food webs</p> <p>Assessment: 1 x Examination</p>	<p>Course Outline: Sedimentary, igneous and metamorphic rocks contain minerals and are formed by processes that occur within Earth over a variety of timescales</p> <p>Assessment: 1 x Examination</p>
Criteria		
Homework	Homework is given after each lesson to reinforce what was learned in the lesson, to prepare for the next lesson (safety and pre-reading) or to research and construct assignments. Homework is usually due the following lesson.	
Excursions / Camps	There are no set excursions for this subject, however, they may occur from time to time.	

Future Pathways

Year 9	Science
---------------	----------------

HISTORY

HIS

Core Subject

Brief Description of Subject

History is a disciplined process of inquiry into the past that develops students' curiosity and imagination. Awareness of history is an essential characteristic of any society. It promotes the understanding of societies, events, movements and developments that have shaped humanity from earliest times. It helps students appreciate how the world and its people have changed, as well as the significant continuities that exist to the present day.

Units studied during the course in Year 7 include:

Depth Study 1: Investigating the Ancient Past

Students will inquire into the ancient past and the role archaeology has played in helping us understand ancient cultures. They will explore the various ways that historians and archaeologists interpret historical evidence of Australia's indigenous past.

Depth Study 2: Ancient Egypt

Students examine daily life in Ancient Egypt. They will explore Egyptian funerary rites as well as the rise of the Queen Hatshepsut.

Units studied during the course in Year 8 include:

Depth Study 1: Shogunate Japan

Students will inquire into the way of life in Shogunate Japan, the Tokugawa Shogun's use of natural resources, the closing of Japan's borders to the West (Sakoku) and reasons why Shogunate Japan fell into decline.

Depth Study 2: Spanish Conquest

Students will investigate pre-Columbian life in the Americas, the impact of the Spanish conquest on the Aztecs and the longer-term effects of colonisation.

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1	<p>Course Outline: Investigating the ancient Past Students inquire into the processes of archaeologists and historians and focus on theories surrounding Australia's megafauna extinction, and the significance of the Keppel Islands to our community.</p> <p>Assessment: 1 x Portfolio</p>	<p>Course Outline: Shogunate Japan Students inquire into the structure of Shogunate Japan and decisions made by the Shogunate to introduce sustainable forestry and limit contact with outsiders.</p> <p>Assessment: 1 x Examination</p>

TERM 2	<p>Course Outline: Ancient Egypt Students examine the daily lives of Ancient Egyptians from different social classes, Egypt’s contact with its neighbours and their religious beliefs and practices, including funerary practices such as mummification.</p> <p>Assessment: 1 x Portfolio</p>	<p>Course Outline: Spanish Conquest of the Americas Students investigate the causes of Spanish colonialism and the short- and long-term effects their contact with the Aztecs had. Students specifically analyse how different values and beliefs lead to conflict between the two cultures.</p> <p>Assessment: 1 x Research Project</p>
Criteria	<p>Questions and Research Understandings Analysis of Sources Communication Knowledge</p>	
Homework	<p>Across the Semester students will be required to do a variety of the following:</p> <ul style="list-style-type: none"> • Preparation and completion of assignments • Practice paragraphs • Vocabulary exercises • Revision and study for tests 	
Excursions / Camps	<p>Nil at present.</p>	

Future Pathways

Year 9	History
---------------	----------------

Brief Description of Subject

Geography allows students to inquire into the interrelationships between human agency and the environment – natural and built, via different lenses including urbanisation and population growth; sustainability; weather and climate.

Units studied during the course in Year 7 include:

Depth Study 1: Water in the World

Students examine the different ways humans interact with and make use of water, an essential element for life on earth.

Depth Study 2: Place and Liveability

Students examine the role employment opportunities, access to health services and education, infrastructure and recreation play in helping people make decisions about where to live.

Units studied during the course in Year 8 include:

Depth Study 1: Landscapes and Landforms

Students examine Earth’s natural landscapes and landforms and the different ways different groups of humans make use of natural geographical features.

Depth Study 2: Changing Nations

Students examine urbanisation and how governments plan both short and long term to accommodate the needs of growing populations.

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 3	<p>Course Outline: Water in the World Students study the forms of water, the different sources of water humans have access to and also the natural conditions that lead to hydrological hazards such as floods, tsunamis and cyclones.</p> <p>Assessment: 1 x Examination</p>	<p>Course Outline: Landscapes and Landforms Students inquire into the geomorphological processes and climatic conditions that lead to the development of distinctive landscapes such as deserts and forests; and landforms such as canyons and stacks.</p> <p>Assessment: 1 x Portfolio</p>

TERM 4	<p>Course Outline: Place and Liveability Students examine the reasons why people choose to live where they do and focus on the different lifestyle opportunities offered in a metropolitan area, compared to a smaller regional town like Emu Park.</p> <p>Assessment: 1 x Research Project</p>	<p>Course Outline: Changing Nations Students analyse their family’s personal migration history before undertaking an urban development project for the hypothetical town, Happy Valley, which is experiencing a surge in population growth.</p> <p>Assessment: 1 x Research Project</p>
Criteria	<p>Questions and Research Interpret and Analyse Communication Knowledge</p>	
Homework	<p>Across the Semester students will be required to do a variety of the following:</p> <ul style="list-style-type: none"> • Preparation and completion of assignments • Practice paragraphs • Vocabulary exercises • Revision and study for tests 	
Excursions / Camps	<p>Year 7 – Liveability study on township of Emu Park</p>	

Future Pathways

Year 9	Nil
---------------	------------

MATHEMATICS

MAT

Core Subject

Brief Description of Subject

The curriculum framework for the junior school aims to be part of an effective transition for P-12 Curriculum Framework. The three content strands of the Australian Curriculum are: Number and Algebra, Measurement and Geometry, and Statistics and Probability.

The four proficiency strands are: Understanding, Fluency, Problem Solving and Reasoning.

Curriculum development is on-going with teachers working in teams to adopt and adapt the planning that has been provided by Education Queensland through the Curriculum into Classroom materials. Each team has leaders who coordinate the implementation across several subject areas, including assessment.

Prominent features of the mathematics curriculum in the junior school are:

1. Student-centered learning
2. Acquisition and integration of knowledge
3. Strong emphasis on the application of higher-order thinking
4. Effective use of technology across the curriculum
5. High, but manageable, expectations
6. Culture of respect and enthusiasm for learning

Teachers work closely together to provide learning activities that occur both within and outside the classroom. The junior school also offers extension and enrichment programs to provide more challenging learning experiences for students.

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1	<p>Course Outline: Introduction to Algebra and the Cartesian plane</p> <p>Assessment: 2 x 60min written examinations</p>	<p>Course Outline: Percentage, Fraction and Probability</p> <p>Assessment: 1 x 60min written examinations 1 x problem solving and modelling task</p>

TERM 2	<p>Course Outline: Decimals, fractions & best buys (unit pricing)</p> <p>Assessment: 1 x problem solving and modelling task</p>	<p>Course Outline: Algebra & Measurement</p> <p>Assessment: 1 x 120min examination (2 parts)</p>
TERM 3	<p>Course Outline: Multiplication of integers & Data</p> <p>Assessment: 1 x 60min written examination 1 x problem solving and modelling task</p>	<p>Course Outline: Data and linear relationships</p> <p>Assessment: 1 x written examination 1 x problem solving and modelling task</p>
TERM 4	<p>Course Outline: Geometry & Measurement</p> <p>Assessment: 1 x written examination</p>	<p>Course Outline: Geometry & Measurement</p> <p>Assessment: 1 x written examination (2 parts)</p>
Criteria	Understanding, Fluency, Problem Solving & Reasoning	
Homework	Regular homework and study are essential for successful completion of Year 7 and 8 Mathematics. Generally, homework is a consolidation of what was learned in class that day and is given to reinforce the lesson, prepare for the next lesson or to research and construct assignments. It is usually due the following lesson.	
Excursions / Camps	The school is an active annual participant in both the Maths Teams Challenge (contested in Year Levels and generally held in Rockhampton) and the Australian Maths Competition.	

Future Pathways

Year 9	<p>Maths or Math Extension (B or A level in year 8 pre-requisite)</p>
---------------	--

HEALTH AND PHYSICAL EDUCATION

HPE

Core Subject

Brief Description of Subject

Health and Physical Education reflects the dynamic and multi-dimensional nature of health and recognises the significance of physical activity in the lives of contemporary Australians.

HPE students use their interests in and experiences of health and physical activity issues to explore how the dimensions of health are dynamic, interrelated and interdependent. They develop the knowledge, skills, processes and dispositions to promote health and wellbeing, actively engage in physical activity and enhance personal development. They recognise that capabilities in health, movement and personal development can provide career opportunities and improve quality of life.

*Students have the option of selecting a **Netball** or **Rugby League** specific class when undertaking HPE. All theoretical units are the same as core HPE but practical lessons are specific to either Netball or Rugby League.*

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1	<p>Course Outline: Who Am I? Students explore who they are, values and beliefs, and how their identity has been influenced by factors such as relationships and the media. Students examine the benefits of diversity and the impact of culture, gender, personality, ability and social inclusion on wellbeing during adolescence. In this unit, students apply personal and social skills to establish and maintain respectful relationships that promote fair play and inclusivity in games and sports. All learning will be through a range of physical activities within the games sense categories of: net/court, invasion, striking and target.</p> <p>Assessment: Written Folio/Journal Physical Performance</p>	<p>Course Outline: Positive Choices In this unit, students investigate strategies and practices that enhance their own, others and community health, safety and wellbeing. Students explore the benefits of physical activity and the difference between social fitness, health fitness and skill fitness. They use various methods to assess their fitness levels and create a plan to improve their fitness. Students participate in physical activities that develop health-related and skill-related fitness components. Physical activities include, but are not limited to: soccer and touch football.</p> <p>Assessment: Written Folio/Journal Physical Performance</p>
TERM 2	<p>Course Outline: Tactical Play Students analyse movement strategies in gameplay to evaluate team performance. Students apply movement concepts and refine strategies to suit different movement situations. In their own performances, they compose and perform movement sequences to demonstrate control and accuracy. All learning will be through a range of physical activities within the games sense categories of: net/court, invasion, striking and target.</p> <p>Assessment: Written Folio Physical Performance</p>	<p>Course Outline: Understanding & enhancing movement Students investigate and apply movement concepts and select strategies to achieve movement and fitness outcomes. They understand basic biomechanical principles and how this knowledge can inform decisions to enhance performance. Physical activities may include: badminton and athletics.</p> <p>Assessment: Written Examination Physical Performance</p>

TERM 3	N/A	N/A
TERM 4	N/A	N/A
Criteria	Investigating Performance	
Homework	Homework expectations involve students revising key concepts throughout the unit. Additional homework is required in assessment time to complete assignments and prepare for exams. Students are encouraged to develop fitness levels and physical skills in their own time.	
Excursions / Camps	N/A	

Future Pathways

Year 9	<p>HPE</p> <p>HPE Extension</p>
---------------	---

JAPANESE

JAP

Core Subject

Brief Description of Subject

One great thing about learning a second language, is that students find out about the differences between their lives and those of people living in another country. Knowing other languages increases the choices students can make in the future, including travelling around the world, perhaps even living and working overseas. Studying a second language gives students an edge in the competitive fields of diplomacy, business and tourism, and will broaden their horizons in today's international scene. The study of languages can expand students' world view and broaden their future opportunities.

Once students have studied one language, they can more easily learn another. In fact, learning another language helps in their study of English. The majority of YSHS students will study Japanese for a semester in Year 7 and 8, with the option of then carrying Japanese through Middle and Senior Schooling.

Brief Course Assessment/Outline

	Year 7	Year 8
TERM 1 / 3	<p>Course Outline: Manga and Anime Students will learn how to describe manga characters in Japanese, using the words for body part, colours and adjectives relating to personality.</p> <p>Assessment: 1 x Writing 1 x Listening</p>	<p>Course Outline: Can I take your order? Students explore Japanese cuisine and etiquette and learn how to take and place orders using culturally appropriate manners.</p> <p>Assessment: 1 x Speaking 1 x Listening</p>
TERM 2 / 4	<p>Course Outline: Mukashi Mukashi Students explore traditional folk tales from Japan and other countries. They will compare and contrast Japanese folk tales with stories from Western countries before creating their own folk tale in Japanese and presenting their story to the class.</p> <p>Assessment: 1 x Speaking</p>	<p>Course Outline: Samurai Spirit Students explore traditional Japanese sporting and cultural activities. Students will be able to ask about and tell personal information including abilities in a culturally appropriate way.</p> <p>Assessment: 1 x Reading 1 x Writing</p>
Criteria	Socialising Intercultural understanding Language systems Creating and information	
Homework	Across the Semester students will be required to do a variety of the following: <ul style="list-style-type: none"> • Preparation and completion of assignments • Research cultural aspects of Japan • Learning new vocabulary and script • Revision and study for tests 	
Excursions / Camp	Students who study Japanese from Year 9 onwards, will have the opportunity to take part in an annual excursion to a Japanese restaurant. Students could also take part in the Japan trip and related programs.	

Future Pathways

Year 9	Japanese
--------	----------

Rotational Subjects in Year 7 & 8

AGRICULTURAL SCIENCE

AGS

Rotational Subject

Brief Description of Subject

Agriculture studies provides students with a wide range of supportive learning experiences where individual ideas are valued and encouraged. Students develop knowledge and skills in environmentally sustainable practices aligned to industry standards and agricultural enterprises. A range of practical orientated activities allows students to participate in the planning, design, production and evaluation of real-world scenarios. Students experience a range of practical activities including livestock nutrition and live weight monitoring, animal husbandry, livestock handling techniques, plant production, agricultural tools and equipment, aquaponics, infrastructure management and fencing.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
Term 1	Students investigate methods of growing fresh produce (plant and animal). Students explain factors that influence the design of environments to meet present and future needs, as well as explain how the features of technologies impact on designed solutions in a technologies context. They create design ideas, make considered decisions and communicate to different audiences using a range of technologies and graphical representation techniques.	Design portfolio – plant based
Term 2		Design portfolio - poultry
Criteria		
Homework	Homework will reflect the theory components of the subject and aligns to project components.	
Excursions / Camps	Possible opportunities for local excursions and competitions may arise over the course.	

Future Pathways

Year 9	Agricultural Science
--------	----------------------

INDUSTRIAL TECHNOLOGIES & DESIGN**TMT**

Rotational Subject

Brief Description of Subject

In Industrial Technologies and Design, students have the opportunity to design and produce products in both woodwork and metalwork environments. They investigate and select from a range of technologies, including materials, systems, components, tools and equipment.

Students identify the sequences and steps involved in design tasks. They develop plans to manage production, including safe and responsible use of materials and tools, and apply management plans to successfully complete design projects. Students establish safety procedures that minimise risk and manage projects with safety and efficiency in mind when making designed solutions.

They use a range of technologies to communicate, including a variety of graphical representation techniques. In addition, they use a range of symbols and technical terms to produce written documentation and concept drawings.

Products manufactured include a basketball hoop and LED light.

Brief Course Assessment / Outline

	Course Outline	Assessment Summary
Term 1	Examining WHS in wood workshop Applying woodworking techniques	Design Project: Basketball Hoop
Term 2	Examining WHS in metal workshop Applying metalworking techniques	Written Exam: Workshop Procedures Design Project: LED Light
Criteria	Knowledge & Understanding, Processes & Production Skills	
Homework	Workbook Activities & Assessment	
Excursions / Camps	n/a	

Future Pathways

Year 9	Wood Technologies Metal Technologies
---------------	---

DIGITAL TECHNOLOGIES**DIG**

Rotational Subject

Brief Description of Subject

Learning in Digital Technologies focuses on further developing opportunities to create a range of digital solutions, such as interactive web applications or programmable multimedia assets or simulations of relationships between objects in the real world.

In Year 7 and 8, students analyse the properties of networked systems and their suitability and use for the transmission of data types. They acquire, analyse, validate and evaluate various types of data, and appreciate the complexities of storing and transmitting that data in digital systems.

Students will also:

- Develop integrated skills in keyboarding, Microsoft Word, PowerPoint and e-mail
- Develop programming skills in Scratch
- Understand themes including copyright and piracy
- Develop advanced internet search skills
- Use technology safely and ethically

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	Computer Fundamentals	Exam
TERM 2	Introductory Programming	Exam & Project
Criteria		
Homework	Homework requirements in DIG will vary depending upon assignment tasks, practical work and class work. Students will be expected to complete set homework and use their diaries to record due dates.	
Excursions / Camps	Opportunities for local excursions and competitions may arise over the Term course.	

Future Pathways

Year 9	Digital Technologies
---------------	-----------------------------

DRAMA

DRA

Rotational Subject

Brief Description of Subject

Students explore a range of texts with a specific focus on the transformation of story into script. Students will learn how to read texts, write and perform texts. Students will investigate the purpose and importance of drama while exploring a variety of cultural contexts.

Storytelling is an essential element of all cultures. Students will explore a range of stories, both historical and contemporary, through the style of Physical Theatre. They will create a short performance of a chosen narrative for an audience.

Students will have the opportunity to watch and respond to a professional live production as part of their studies.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	Page to Stage <ul style="list-style-type: none"> Develop improvisation skills and introduction to elements of drama Experiment with scripts that are written for teens and rehearse for presentation Analyse and evaluate work of self and others 	Making – Improvisation and small-group performance Responding – Journal and elements of drama analysis
TERM 2	Moving Stories <ul style="list-style-type: none"> Explore a range of texts with a specific focus on the transformation of story into script, read, write & perform texts. Investigate purpose & importance of drama while exploring traditional and contemporary storytelling Learn non-Western drama forms, including stage combat Devise theatre using the body as primary tool of communication 	Making – Devising and Performance Actor's Journal
Criteria	Making includes learning about and using knowledge, skills, techniques, processes, materials and technologies to explore Arts practices and make artworks that communicate ideas and intentions. Responding includes exploring, responding to, analysing and interpreting artworks.	
Homework	Homework is a written reflection of what was learned in class that day and is given to prepare for the next lesson. Students may also be required to prepare for the next lesson or to research and construct assignments.	
Excursions / Camps	View live theatre performance	

Future Pathways

Year 9	Drama
---------------	--------------

ECONOMICS AND BUSINESS

ECB

Rotational Subject

Brief Description of Subject

The Year 7 and 8 Business and Economics curriculum gives students the opportunity to explore what it means to be a consumer, a worker and a producer in the market. Students explore the characteristics of successful businesses and consider how entrepreneurial behaviour contributes to business success. Setting goals and planning to achieve these goals are vital for individual and business success, and students consider approaches to planning in different contexts, while also considering different ways to derive an income. The emphasis in Year 7 and 8 is on personal, community, national or regional issues or events, with opportunities for concepts to also be considered in the global context where appropriate.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	Through the Civics and Citizenship curriculum, in Years 7 and 8 students develop knowledge and understanding of Australia's political system, with particular emphasis on freedoms, representative democracy and the role of the constitution. They develop an understanding of the key features of Australia's legal system and the different sources of law used in Australia. Students also learn about the diversity of Australian society and the importance of a national identity.	Make a Difference Project This assessment task will give you the opportunity to work as a team to make a difference in an identified area of the community. Your difference could be within the school, for the environment or through a local charity or support group.
TERM 2	The Year 7 and 8 Business and Economics curriculum gives students the opportunity to explore what it means to be a consumer, a worker and a producer in the market. Students explore the characteristics of successful businesses and consider how entrepreneurial behaviour contributes to business success. Setting goals and planning to achieve these goals are vital for individual and business success, and students consider approaches to planning in different contexts, while also considering different ways to derive an income.	Shark Tank Business Project This task requires you to investigate a business concept and present it for development in Yeppoon. You are required to prepare a short presentation of your business idea to a group of people you are hoping will invest in your business.
Criteria		
Homework	Homework requirements in Business and Economics will vary depending upon assignment tasks, practical work and class work. Students will be expected to complete weekly homework.	
Excursions / Competitions	Opportunities for local excursions and competitions may arise over the term course.

FOOD TECHNOLOGIES

TFD

Rotational Subject

Brief Description of Subject

In Food Technologies, students have the opportunity to create designed solutions in the context of food specialisations, while designing and producing products, services and environments.

Students will investigate and select from a range of technologies, including materials, systems, components, tools and equipment. They use creativity, innovation and enterprise skills with increasing independence and collaboration. They evaluate design solutions, while using a range of technologies to communicate.

Students develop plans to manage food production, including the safe and responsible use of ingredients and equipment, while applying management plans to successfully complete design tasks. Students establish safety procedures that minimise risk to manage projects with safety and efficiency in mind when making designed solutions.

More specifically, Food Technologies is based on the wellbeing of individuals within the broader structure of family and community. Students develop an understanding of the importance of healthy eating, while exploring a range of culinary skills. They are empowered to think critically and creatively to solve contemporary problems.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	<ul style="list-style-type: none"> Examining WHS in kitchen Exploring healthy eating Applying culinary techniques 	Written Exam: Food Safety & Hygiene Practical Performance: Spicy Pork Noodles
TERM 2	<ul style="list-style-type: none"> Examining WHS in kitchen Planning small events Applying culinary techniques 	Design Project: Birthday Party
Criteria	Knowledge & Understanding, Processes & Production Skills	
Homework	Workbook Activities & Assessment	
Excursions / Camps	n/a	

Future Pathways

Year 9	Food Technologies
---------------	--------------------------

Brief Description of Subject

Students learn the elements of music, through a theoretical and practical study into popular music. Throughout this unit, students will learn an instrument, and respond to professional musician’s performances.

Students identify and analyse how the elements of music are used in different styles and apply this knowledge in their performances and compositions. They evaluate musical choices they and others from different cultures, times and places make to communicate meaning as performers and composers.

Students manipulate the elements of music and stylistic conventions to compose music. They interpret, rehearse and perform songs and instrumental pieces in unison and in parts, demonstrating technical and expressive skills. They use aural skills, music terminology and symbols to recognise, memorise and notate features, such as melodic patterns in music they perform and compose.

	Course Outline	Assessment Summary
TERM 1	Fascinating Rhythm <ul style="list-style-type: none"> • Students experiment with basic music elements and learn simple compositional techniques • Develop skills in playing an instrument – ukulele and perform a short song showing technical skill • Analyse how the musical elements have been structured to create meaning 	Making – Composition and Performance Responding – Musicology Exam
Criteria	Making includes learning about and using knowledge, skills, techniques, processes, materials and technologies to explore Arts practices and make artworks that communicate ideas and intentions. Responding includes exploring, responding to, analysing and interpreting artworks.	
Homework	Homework involves revising concepts learned in the lesson, completion of workbooks if incomplete during class time and completion of assessment.	
Excursions / Camps

Year 9	Music
---------------	--------------

Rotational Subject

Brief Description of Subject

Students are bombarded with hundreds, perhaps thousands of images every day. From their phones, computers, TV's and tablets. To the more traditional forms within magazines, newspapers and billboards. The ability to analyse, interpret and harness this information forms the basis for this course.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	Behind the Lens <ul style="list-style-type: none"> Develop and refine media production skills to shape the technical and symbolic elements of images, sounds and text for a specific purpose and meaning Plan, structure and design media artworks that engage audiences Analyse how technical and symbolic elements are used in media artworks to create representations influenced by story, genre, values and points of view of particular audiences 	Making – 2-minute Western Style Shootout (Storyboarded, filmed, edited and scored by students) Responding – Workbook which analyses basic elements and principles of moviemaking.
Criteria	Making includes learning about and using knowledge, skills, techniques, processes, materials and technologies to explore Arts practices and make artworks that communicate ideas and intentions. Responding includes exploring, responding to, analysing and interpreting artworks.	
Homework	Homework involves revising concepts learned in the lesson, completion of workbooks if incomplete during class time and completion of assessment.	
Excursions / Camps

VISUAL ART

ART

Rotational Subject

Brief Description of Subject

Students will explore the five elements of Visual Arts: Line, Colour, Shape, Tone and Texture. They will be making art using a variety of mediums and techniques, creating Aboriginal Australian art, responding to an artist's work and reflecting on how they work and present their art.

Students will also create a digital art unit that explores local Indigenous history and dreamtime stories through clay-mation. Students will also be provided the opportunity to work together in groups to achieve tasks within set time-frames.

Brief Course Assessment/Outline

	Course Outline	Assessment Summary
TERM 1	The World of Art <ul style="list-style-type: none"> • Introduction to the elements of art • Experiment with different mediums and the elements of art • Analyse and evaluate professional artworks • Create Sculpture and mono-prints • Reflect on own art and aesthetic choices 	Responding - Analytical paragraph Making – Folio
TERM 2	The Dreaming <ul style="list-style-type: none"> • Exploring Indigenous dreamtime stories and communication through the digital art form of Claymation. • Experiment with art elements and technology • Analyse and evaluate artist choices in own and others’ work 	Making: 2D, 3D & 4D recreation of dreamtime story Responding: analysis and reflection tasks in journal booklet
Criteria	Making includes learning about and using knowledge, skills, techniques, processes, materials and technologies to explore Arts practices and make artworks that communicate ideas and intentions. Responding includes exploring, responding to, analysing and interpreting artworks.	
Homework	Homework involves revising concepts learned in the lesson, completion of workbooks if incomplete during class time and completion of assessment.	
Excursions / Camps

Excellence Subjects

Music Excellence

Music Excellence is an immersion program that extends theoretical knowledge and practical ability in music. The course is a mixture of Australian Curriculum and formal certification courses through Australian Music Examination Board (AMEB). Students study this class twice a week – Wednesday morning from 8:00AM through to the first bell and Friday during AM break. This course is offered to students across all year levels with students able to achieve QCE points in the later years.

Students who are currently studying an instrument in primary school are encouraged to apply for this course.

An Expression of Interest will be distributed through the primary school music teachers or can be collected from the Performing Arts Staffroom.

Japanese Excellence

Yeppoon State High School offers a competitive Japanese Excellence Program which combines extension instruction with an immersion component rarely available to students living outside QLD's south-east corner. Students complete mandatory ACARA: Japanese in Semester 1 together with their high achieving and passionate Japanese Excellence peers, before completing a semester of Japanese Immersion - class conducted *in Japanese* - during an elective line in Semester 2.

Japanese Excellence equips students with the intercultural skills required in today's competitive, globalised world. Students engage with Japanese culture in class and partake in lessons with our Japanese Sister-School, Wako Kokusai, during their annual visit to Yeppoon.

A place in our Japanese Excellence program can broaden student's perspectives of the world, increase their intercultural competence and make avail opportunities for immersion and enrichment, not otherwise else available.

Enrichment Subject

Instrumental Music

The school also offers an award-winning Instrumental Music Program. Some students may already be participating in these programs through their primary schools but new participants are always welcome to sign up. Lessons are typically 35 minutes and take place once a week.

The program has five ensembles:

- Concert Band
- Big Band
- String Orchestra
- Choir
- Percussion Ensemble

As part of the Instrumental Music Program, students will be required to attend an Instrumental Music Camp to prepare their repertoire. We also aim to take our ensembles on tour around the state. In 2017, the students went on an outback tour, playing music throughout Central Queensland from Emerald to Longreach.

The YSHS Concert Band participates in the bi-annual Instrumental Competition, 'FANFARE'. In 2016, the Concert Band was crowned Best Ensemble for Central Queensland and in 2018 Regional Finalists. This year, 2022, the Concert Band achieved a Gold and the Big Band Silver at the CQ Heats. The YSHS Concert Band will be competing at the Finals.

Other performances include Rockhampton Eisteddfod, Capricorn Secondary Music Festival, Village Festival, Community Anzac Day Parade, Central Queensland Jazz Festival, Pinefest and Brisbane's Prestige Music Festival.
